CTL Computer Monitors

CTL Computer Monitors offer some of the best values on the market. With LCD, LED and ADS models, 22" to 27" screens, and both FHD and QHD displays, this monitor line is a cost-effective workhorse for the office, classroom, or home.

IP2155 22'' LED Monitor

With a 21.5" 1920 x 1080 display, the CTL IP2155 monitor delivers high quality performance through content-rich pages for seamless viewing and a top notch user experience for any type of workflow.

This monitor offers high luminance controls for better brightness regulation and FreeSync capabilities for the most accurate monitor refresh rates. This monitor enables users to maintain high levels of productivity from consistent streaming to graphic-heavy presentations and more.

IP2381/IP2381H 24" LED Monitor

Simple, elegant, and packed with features, the CTL IP2381 LED monitor is a classic design intended for maximum multimedia enjoyment at a minimal price. And it certainly does deliver.

It's the perfect all-encompassing screen made for everyone to enjoy. Graphic designers, gamers, photographers, entertainment buffs, web surfers, and business professionals alike will benefit from its accurate colors and wide viewing angles. Model IP2381H is height adjustable.

IP2781/IP2781H 27" ADS Monitor

Welcome the latest and greatest visual technology into your home or office with CTL's 27" QHD ADS display. You won't just see the images on the screen, but you'll feel like you're a part of the action!

ADS monitors offer many of the advantages of IPS panel displays but with superior performance. Similar to IPS, ADS employs plane control technology to achieve consistent, accurate color, even in sharp angles. Model IP2781H is height adjustable.

The CTL Computer Monitor Series

Value. Quality. Performance.

CTL computer monitors offer budget-friendly displays with exceptional visual technology and connectivity.
